

The background of the slide features a dark blue grid with several financial charts. At the top, a green line graph shows a downward trend with a peak labeled '1.7810' and a subsequent dip labeled '1.7765'. Below this, a candlestick chart is visible with a blue circle highlighting a specific bar. Further down, a dashed line graph shows an upward trend with a label '05.14'. At the bottom right, a red line graph shows an upward trend. The overall theme is financial data and market analysis.

Bond Pricing Valuation Engine (BVE)

FactEntry is an independent provider of bond data and documents, incorporated since 2007, with extensive knowledge of the global debt capital markets.

We have developed a calculation engine that leverages our bond cash flow data and facilitates pricing of illiquid bonds. Our bond pricing input comes from brokers and market participants along with the traded data. Our (BVE) calculation engine is a result of over three years of R&D with the experienced quant team that has done extensive work with banks and hedge funds.

The Fair Value Data is available the next day for previous EOD before the markets opens.
