

The background of the entire page is a dark blue grid with various financial data visualizations. At the top, there are two line graphs: a green one and a blue one. The green line has a peak labeled '1.7810' and a subsequent dip labeled '1.7765'. Below these, there are several candlestick charts. One candlestick has a value of '14.56' next to it. Another candlestick has '19.10' next to it. To the right, there are more candlesticks with '05.14' and '08' nearby. A pink line graph is visible in the lower right quadrant. A large white circle highlights a specific area in the middle of the charts.

About MATS

MATS (Municipal Action Tracking Service) tracks disclosures for portfolios of US Muni entities. The primary focus is to cover a comprehensive number of Muni Actions enacted by the issuer and ensure that they are transmitted to the user accurately and in a structured manner for ease of application either as a data feed or email alerts.

Who uses MATS?

We have a comprehensive coverage for all the muni events/disclosure. The service is focused towards the following client groups -

- Risk Managers
- Front Desk Research
- Portfolio Managers
- Syndicate Desk
- Fund Managers
- Hedge Funds

Why MATS?

The challenge is that information in such disclosures are the key for the traders / dealers and fund managers to quantify the qualitative information and building that bridge is what defines the changes in the pricing of asset. Key benefits include -

- Monitor all updates announced for continuing disclosure events
- XML feed for defined events
- Coverage includes 80(+) Muni Action types
- Data granularity which calibrates the impact of the event
- Data based on defined identifiers or entities (ticker) mapped in our database for a client
- Highlighting the hidden information and comprehensive analysis
- Ensure accuracy in any change
- Positive identification of issues
